

Supporting Survivors Navigating the Legal System and Recovery

Survivor-Requested Support:

Education:

Survivors have expressed the need for **education on non-physical and coercive control**.

Virtual Court Accessibility:

Survivors found virtual court proceedings during COVID-19 to be safer and appreciated the control over their visibility. **This option should be available to survivors at all times.**

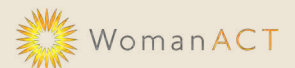

Comprehensive Support:

Many survivors, often single parents juggling multiple jobs, struggle with childcare and the financial burden of legal processes. **They require support equivalent to this journey's monetary resources and labor.**
